Lush Wild Acres
BY WECOMMUNITIES

About Us

NCR's rise as a commercial hub has created an ever-growing demand for quality living spaces, with WeCommunities' growth deeply intertwined with the city's dynamic development.

Since our founding in 2017, our mission has been clear: to redefine residential living and enhance lifestyles. This commitment is evident in our farming collectives across three states in India, where life centers around regenerative farming and eco-conscious housing. These collectives are all situated near major cities.

Recognizing the desire for this unique lifestyle closer to urban centers, we launched our latest project: the first homestead that offers the best of both worlds—thriving in natural surroundings while staying connected to the city's vibrant spirit.

Experience a better life in a farmstead that exceeds your expectations
